Phase 08

Model Data and Key Performance Indicators

08

PHASE IN MODEL

Choose measures that connect implementation to meaningful change.

Project / team: _____ **Community / setting:** _____ **Date:** _____

Write the causal logic

How should each action change a barrier and lead to a participation outcome?

What assumption must be true for the logic to hold?

Separate outputs and outcomes

What activities or items will be counted? What change in use or opportunity matters?

Choose at least one measure of sustained participation.

Specify indicators and sources

For each indicator, define numerator or scale, denominator, source, frequency, and owner.

Can results be examined across groups and places fairly?

Plan reviews and data care

When will participants and partners review findings and take action?

What privacy, consent, data quality, and retention safeguards apply?

Phase output: What will you carry forward to the next decision or phase?
