Phase 10

# Outcomes Evaluation and Continuous Improvement

Assess durable participation and feed learning back into the model.

**Project / team:** _____ **Community / setting:** _____ **Date:** _____

## Evaluate meaningful outcomes

Did people participate more fully in learning, work, services, or civic life?

How long did the change last, and for whom?

## Assess equity and sustainability

Who benefited, who did not, and what burdens remain?

Can resources, governance, support, and maintenance sustain the gains?

## Explain the findings

Which mechanisms likely produced change? What evidence challenges that explanation?

Separate observed findings from interpretation and remaining uncertainty.

## Close the feedback loop

Which earlier phase must be revisited and what should be changed?

Name the next test, decision owner, and date for review.

**Phase output: What will you carry forward to the next decision or phase?**
